- Creative and Idea Driven
- Efficient in Time Management
- Game Design, Level Design, Programming, 2D Art

QUALIFICATIONS

- Strong grasp of system designs, level design, game economy, and progression loops.
- Skilled in writing clear design documentation.
- Experience using data to create systems and drive design.
- Excellent collaboration and communication skills.
- Knowledgeable in animating and animation programs.
- Mastery over 3 game engines: Unity, Unreal Engine, Godot.

PROJECTS

Deep Dives | Unity | 2025 - Present

Game Designer, Programmer, Artist, Sound Designer

- Designed and implemented modular systems and tools to solidify the foundation for future updates.
- Spearheaded the creation of a scalable economy to ensure consistent and intriguing gameplay.
- Designed narrative, game mechanics, user interface, music, and sounds.

Patient R21 | Unity | 2024 - 2025

Game Designer, Artist, Sound Designer, System Designer

- Worked in a team of 5 to deliver a point and click horror game before the end of the school semester.
- Collaborated and communicated through Miro and Jira to ensure design goals are met and development logs are documented.
- Designed and balanced level progression to maintain player engagement.
- Conducted play testing sessions for telemetry to collect numerical data and applied player feedback to tune systems.

Explod-O-Motive | Godot | Design Week 2025

Game Designer, Programmer, Level Designer

- Created the core mechanic of the game based on game jam limitations.
- Managed and prepared a team of 5 to work on GitHub and Godot.
- Programmed 3/4 engaging puzzles for players to solve

Pixel Wallpapers | Unity | 2024

Artist, Animator, Programmer

- Iterated on multiple designs for character concepts, colors, and environments.
- Created cohesive animations to work in unison with player activity.
- Implemented applications and assets to Wallpaper Engine and Unity
